Metal Finishes

The Wabi is a departure from the more symmetrical shapes of our other lines, celebrating the natural movement and fluid matter of the glass. It gets its namesake from the Japanese world view of wabi-sabi, which embraces imperfection. Hand blown and shaped in lead free crystal. No molds are used, and each glass shape is unique.

*Each piece of hand-blown glass is a unique work of art. Dimensions, weight, and color will vary.
When multiple fixtures are installed next to each other, expect some variation in shape and color.

**Alternate voltages and socket types are available upon request

6' tall person
